PERSONAL DETAILS

DOB: 13-10-1998
Sex: Male
ID No: 24-2023732Y-24
Languages: English, Shona

CORE EXPERTISE

- Creating layout Plans for land development.
- Georefrencing and digitizing maps.
- Python scripting for data analysis of GIS maps.
- Land suitability analysis and land use landcover mapping.
- Creating database and management of database.
- Understanding of Change of uses planning and Subdivissions.
- Burn severity mapping
- Mapping enviromental degradtion In Forests and Green protected areas.
- Assisting other departments with GIS mapping and analysis

TECHNICAL SKILLS

- CAD(AutoCAD , NanoCAD)
- Web GIS Development
- Google Earth Engine
- Geo AI
- QGIS (spatial analysis & cartography)
- Remote sensing image interpretation & aerial imagery analysis
- KobotoolBox data collection
- Blender GIS (3D terrain modelling)
- Spatial databases
- MS Office (Word, PowerBI, Excel)

FIELD WORK SKILLS

- GPS/GNSS field data capture
- Cadastral & boundary surveys
- Ground-truthing of remote sensing data
- Land use inspections & site assessments
- Community & stakeholder liaison
- Municipal planning and enginerring support

PERSONAL ATTRIBUTES

- Industrious
- Critical thinking
- Collaborative
- Problem solving and troubleshooting
- Takes initiative

TAVADAI SHE A. MUZANENHAMO

Geospatial , Remote Sensing , Geo AI & Survey Proffessional

PROFILE

I am a qualified and self-driven GIS professional with two years of work experience, combining geospatial analysis across Planning, Environment and Engineering workflows into a unified system driven decision that supports Municipal and Rural Council operations . A hands-on field work experience, detail-oriented team player and dedicated to fully harness spatial technologies in making productive Local Governance planning, land and natural resource management.

EXPERIENCE

GIS Intern – Spatial Planning Department | Feb 2024 – Apr 2025
Chegutu Municipality

- Completed a work-integrated internship at Engineering and Spatial Planning department, gaining direct exposure to municipal GIS operations and planning standards
- Supported land use mapping, cadastral data , property evaluation data management , and spatial data collection for municipal planning processes
- Conducted field verification and ground-truthing of spatial datasets to ensure accuracy against on-the-ground conditions
- Assisted with the preparation of maps and spatial reports to support planning and engineering development decisions
- Applied GIS skills to support Water, Sanitation and Hygiene (WASH) related projects within council planning initiatives

GIS Area Specialist | sept 2025 – Present
Triad Mining Solutions

- Provide area-based spatial technical support and field survey site operations
- Use remote sensing mapping for environmental assessment and exploration

Independent GIS & Remote Sensing Consultant | 2023 – Present

- Carbon and emissions mapping projects, including land use and forest carbon stock assessments for **TREECANOPY CONSERVATION** .
- A mapping and progress tracking system for WASH projects tendered to **SKIES PROJECTS** across Mutare and Marondera local authorities , filter Beds water treatment projects
- A GIS based Construction project monitoring dashboard , issuing weekly reports , realtime photos of Site development for **JEOTAM ENGINEERING AND CONSTRUCTION**.
- Water resource surveys using GIS and remote sensing to support borehole siting and hydrological assessments
- Geo AI Smart city infrastructure mapping .
- 3D spatial modelling and terrain visualization for design and planning projects.

EDUCATION

Bachelor of Science Geography Honours Degree in Geographical Information Science and Earth Observation
University of Zimbabwe
